EXPERIENCE

Web Content Writer

January 2025 – Present

JU Verse

Jaipur, India

- Authored 30+ technical articles on cybersecurity awareness, campus technology initiatives, and student tech projects, reaching 5,000+ community members with 40% average engagement rate
- Optimized content strategy using SEO techniques, increasing organic search traffic by 65% and improving content discoverability across university digital channels
- Spearheaded cross-functional collaboration with 5-member design and editorial team to establish consistent brand guidelines and quality standards for all published content
- Researched emerging cybersecurity trends and translated complex technical concepts into accessible educational material for non-technical audiences

Script Writer

August 2025 – September 2025

The Trading Fox

Jaipur, India

- Researched and produced 15+ educational scripts covering financial markets, trading strategies, and investment analysis for multi-platform digital content distribution
- Translated intricate financial derivatives and algorithmic trading concepts into audience-friendly narratives, achieving 92% client approval rating on first submission
- Delivered all project deliverables ahead of schedule while maintaining 100% technical accuracy through rigorous fact-checking and subject matter expert consultation

Content Strategy Intern

December 2024 – February 2025

Peershala

Remote

- Architected multi-format content strategy generating 50+ Instagram posts (Stories, Reels, carousels) focused on professional development, achieving 85% increase in follower engagement month-over-month
- Analyzed audience behavior patterns using Instagram Insights, identifying 3 high-performing content themes that drove 120% growth in post reach and 200% increase in profile visits
- Developed brand voice guidelines and content templates adopted company-wide, reducing content production time by 30% while maintaining quality consistency

Technical Volunteer - CodeHunt Competition

December 2024 – March 2025

JECRC University Rythm

Jaipur, India

- Orchestrated technical infrastructure for competitive programming event hosting 150+ participants, achieving 99.5% platform uptime through proactive system monitoring and rapid issue resolution
- Debugged 40+ technical queries related to platform navigation, code compilation errors, and submission protocols, reducing average resolution time to under 3 minutes
- Enforced competition integrity protocols by implementing real-time monitoring systems that detected and prevented 5 potential rule violations

Projects & Technical Initiatives

Network Security Assessment Lab: Executed comprehensive penetration testing on simulated enterprise network using Metasploit and Nmap, identifying 12 critical vulnerabilities and documenting remediation strategies with 95% effectiveness rate

Phishing Detection System: Engineered Python-based email analysis tool leveraging machine learning algorithms to classify phishing attempts with 89% accuracy, processing 1,000+ sample emails during validation testing

Cybersecurity Education Blog: Published 20+ technical articles breaking down security concepts, OWASP Top 10 vulnerabilities, and threat intelligence reports, attracting 2,500+ unique readers and 500+ recurring visitors
